GYM & SPORTS CENTRE

Gym

A gymnasium, also known as a gym, is a covered location for athletics. The word is derived from the ancient Greek term "gymnasium". They are commonly found in athletic and fitness centres, and as activity and learning spaces in educational institutions. "Gym" is also slang for "fitness centre", which is often an area for indoor recreation. A "gym" may include or describe adjacent open air areas as well. In Western countries, "gyms" (or pl: gymnasia") often describe places with indoor or outdoor courts for basketball, hockey, tennis, boxing or wrestling, and with equipment and machines used for physical development training, or to do exercises. In many European countries, *Gymnasium* (and variations of the word) also can describe a secondary school that prepares students for higher education at a university, with or without the presence of athletic courts, fields, or equipment.

Overview

Gymnasia apparatus like barbells, jumping board, running path, tennis-balls, cricket field, and fencing area are used as exercises. In safe weather, outdoor locations are the most conducive to health. Gyms were popular in ancient Greece. Their curricula included self-defense, gymnastica medica, or physical therapy to help the sick and injured, and for physical fitness and sports, from boxing to dancing to skipping rope.

History

The first recorded gymnasiums date back to over 3000 years ago in ancient Persia, where they were known as zurkhaneh, areas that encouraged physical fitness. The larger Roman Baths often had attached fitness facilities, the baths themselves sometimes being decorated with mosaics of local champions of sport. Gyms in Germany were an outgrowth of the *Turnplatz*, an outdoor space for gymnastics founded by German educator Friedrich Jahn in 1811 and later promoted by the Turners, a nineteenth-century political and gymnastic movement. The first American to open a public gym in the United States using Jahn's model was John Neal of Portland, Maine in 1827. The first indoor gymnasium in Germany was probably the one built in Hesse in 1852 by Adolph Spiess.

HEALTH CENTER

College health-service programs provide low-cost, primary medical care for students on college campuses, college students received primary health care from campus health programs. Just as modern medicine has changed, so too has the scope of services college health centers provide. Medical developments allow for most injuries and illnesses to be treated by ambulatory clinics, and this same trend is seen in most college health centers. Health centers often provide care for acute illnesses and injuries on an outpatient basis, while also meeting the needs of students with continued and chronic illnesses and providing wellness education to the campus community.

In addition to meeting the basic and most common needs of the students they serve, campus health- service programs also act as referral agents for students to connect with medical providers, as needed, in the local community. College health services are continually evolving and changing in order to best provide treatment and education for the campuses they serve.

Health center conducted various health awareness programmes such as

- **RED RIBBON AWARENESS PROGRAMME,**
- **AIDS AWARENESS PROGRAMME,**
- **COVID-19 VACCINATION,**
- **World Cancer day,**
- **National deworming day,**
- **World health day,**

- The main reason behind it is that PowerPoint presentations enable you to interact with your audience psychologically. So, here we're going to discuss the power of PowerPoint in education.

AGRICULTURAL MARKETING:

Agricultural marketing is a method that includes gathering, storage, preparation, shipping, and delivery of different farming materials across the country. In agriculture marketing, the selling of an agriculture product depends on various components like the demand for the product at that time, availability of storage, etc.

Before Independence, farmers while selling their products to traders experienced massive incorrect weighing and manipulation of accounts. The farmers did not have required information about the prices and were forced to sell at low prices with no proper storage facility.

Sometimes, the product could be sold at a weekly village market in the farmer's village or in a neighbouring village. If these shops are not available, then the product is sold at irregular markets in a nearby village or town, or in the mandi. So, the

BUSINESS CYCLES:

A business cycle is a period that describes the natural ebbs and flows within an economy. The term "business cycle" can be used to describe both economic expansions and recessions. Generally, what we know is that a recession starts with a decline in production and sales levels. This decline usually lasts for 18 months or more before it reverses again into an expansion phase where production and sales increase once again.

- Additionally, by using PowerPoint slides in conjunction with other instructional materials, such as textbooks and handouts, teachers can ensure that all students are able to access the information being presented in class. PowerPoint presentations can be a powerful tool for teaching and learning when used effectively.
